Below are Equinox Marathon results in text format, followed by Equinox Ultramarathon results in text format, for all who finished through the time the finish line closed at 6:00PM.

Links to PDF files of all complete results are now available. Marathon class and overall results are only available in the format where men's and women's results are published in the same report. It will take a few days to upload all the files for all the various permutations of results.

The results for those who finished between 3PM and 6PM, and complete ultramarathon results will be published in Tuesday's News-Miner, not in Monday's paper as earlier reported on this website.
