Notes on Items of Statistical and Historical Interest

Below are notes on statistically or historically interesting items drawn from this year's Equinox Marathon. These notes are organized in the same structure and order as the statistical reports that follow. You can read this section and skip the statistical reports and graphs, or use this as a guide to find the items that interest you.

1. Champions

1.1. Champions Year-by-Year
Anna Dalton and Lars Arneson, two 31-year-olds from Anchorage, became the 57th champions of the Equinox Marathon, Dalton smashing the existing record in the process.

1.2. Margins of Victory
Dalton's victory margin of 4:35 over Megan Youngren was the 22nd closest finish on the women's side. Arneson's winning gap of 9:14 over Tobias Albrigtsen was among the 10 largest in the races history. It was only one second closer than the 8th-closest, Stan Justice's 1986 win over Mike Johnson by a margin of 9:15.

1.3. Fastest to Slowest Winners
Arneson was the 23rd-fastest winner of the men's race. Dalton moved to the top of the list with her record-breaking performance.

1.4. Youngest to Oldest Champions
Both winners landed right in the middle of this list – Dalton 29th-youngest and 29th-oldest, and Arneson 27th-youngest and 30th-oldest. Early 30's is clearly the prime age to be an Equinox Champion.

1.5. Multiple and Consecutive Winners
There were no changes to our list of multiple and consecutive winners

2. Podiums

2.1. Year-by-Year Podiums with Times
On the men's side there were three first-time podium finishers (Arneson, Albrigtsen, Max Donaldson) and two repeat offenders (Allan Spangler, Matias Saari). On the ultra-fast women's side, all of the first five runners were making their first visit to the Equinox podium.

2.2. List of Runners with Podium Finishes
Saari's late-race surge onto the podium increased his dominance in the category of most times on the Equinox podium – it was his 17th time on the podium. If he can finish third one more time he will have two complete "table settings" of plates. He has 6 wins, 6 runner-up finishes, 2 fourth-place finishes and 2 fifth-place finishes, but only 1 third place.

2.3. Average of Podium Finishers Times
The women's race was remarkably fast with the first four runners breaking the course record, and the fifth-place finisher only about 90 seconds slower than the record. With so many fast times, the average time of the five women on the podium was by far the fastest-ever: 14:12 faster than the very fast 2002 race, when the first two women (Susan Faulkner and Jane

LeBlond) broke the existing course record.
The men's podium finishers were not as fast as a group. Their average time 3:04:20) was the 31st-fastest among 57 races, and was the slowest since 2004's 3:07:19.

2.4. Average Ages of Podium Finishers
There was nothing remarkable about the average ages of the podium finishers for either sex, although the men's average would have been considerably below the long-term average had not 51-year-old Matias Saari not become the oldest podium finisher ever. Both podiums averaged within one year of the long-term average age for their respective genders.

3. Records

3.1. Course Record Progression
After a 12-year gap between women's course records (Susan Faulkner's 3:18:16 in 2002 until Christy Marvin's 3:17:09 in 2014), the women's record has been broken three times in the last seven runnings of the Equinox: Marvin in 2014, Marvin again with 3:15:06 in 2018, and Dalton's 3:07:21 this year. The women's record was broken four times in the seven-year period from 1982 through 1989, and six times from the 1979 race through the 1989 race. Dalton's margin over the existing record of 7:45 was the biggest difference between old and new records since Pat Kling 3:37:59 in 1981 broke Mara Rabinowitz's 1979 record of 3:48:40 by 10:41.

3.2. Age-Group Records
Four new age group records were established in the 2021 race:
Women 20-29 – Klaire Rhodes' 3:16:25 broke Jane LeBlond's 19-year-old record of 3:19:59 which was the second-fastest women's time ever at that point.
Women 30-34 – Anna Dalton smashed Christy Marvin's record by nearly 10 minutes. Marvin still holds the women's 35-39 age group record.
Women 40-49 – Meg Inokuma erased another 19-year-old mark, Susan Faulkner's 2002 then course record of 3:18:16
Men 80+ - Fred Moore's 6:41:45 topped Dale Feist's 2018 record by almost 95 minutes. Fred Moore now holds age records for 77, 78, 79 and 81. He would probably have the record for 80-year-olds had the Equinox been held in 2020.

3.3. Year-by-Year Age Records
2021 was a banner year for age records, with four records established on the men's side and nine in the women's race. Complete details are in the report. Highlights:
Each of the first five women: Dalton (31), Youngren (30), Susanna Rivard (34), Meg Inokuma (41) and Klaire Rhodes (23) set a record for her age. Dorli McWayne posted a new mark for age 68. She also holds the records for ages 51, 52, 53, 56, 57, 59, 62, 64 and 65. The closest any runner is to her 10 age records is Matias Saari who holds nine age records 39, 40, 41, 42, 43, 44, 45, 46 and 49. Stan Justice and the late Jim Madonna hold six each.
In the men's race all the action took place among the senior citizens. Greg Finstad showed his recovery from COVID is coming along nicely with an age-66 record, Terry Honeysett added an age 69 record to the age 67 record he set two years ago, Pete Hjellen made up for losing the age 69 record to Terry Honeysett by picking up the age 76 record with a 6:38:34 at the expense of Nobuhar Kohara. Fred Moore established an age 81 record of 6:41:45 – there was no previous age 81 mark.

3.4. A list of all times for each age
If you are really curious about where you stack up, at the end of this booklet is an appendix with all times for each age (ages that we know – there are a few unknown ages) with data from 1997 to the present.

4. ***Times***

4.1. 30 Fastest Women and Men

This year I increased the number of runners on this list from 25 to 30 because it seems like there are so many worthy times. The list of the 30 fastest women underwent an unprecedented rewriting, with seven of the first eight women (Dalton, Youngren, Rivard, Inokuma, Rhodes and Fairbanksans Shalane Frost and Melanie Nussbaumer) making their first appearance on the list, and Katie Krehlik remaining on the list after earning her spot with a 3:25:35 at age 25 in 2015.

4.2. The 200 Best Times for Each Gender

This list used to be the top 100 times for each gender, but there have been so many fast times since I first started the list that it seems a cutoff of 200 is more appropriate. The first four men (Arneson 31st, Albrigtsen 113th, Spangler 142nd, Donaldson 191st) all made the top 200. Spangler also holds the 19th and 34th fastest times on the list. Displaced from the men's top 200 were Corky Hebard (3:08:58 in 1981), Steve Humpel (3:8:58 in 2010), Jonathan Chaffee (3:19:17 in 1967 – 54 years ago!) and Mike Scanlan (3:9:27 in 1982)

All of the first 10 women made the list and had it not been for so many fast runners ahead of her in this year's race, 11th place Jennifer Love would have made the list with her 3:52:46, which places her 204th among women. Dalton, Youngren, Rivard, Inokuma and Rhodes now occupy positions 1-2-3-4-6 on the list. Shalane Frost (6th this year) posted the 20th-fastest time ever. Seventh and eighth-place finishers Katie Krehlik and Melanie Nussbaumer now rank 46th and 47th. Krehlik now occupies four positions on page one of this list: 11th, 29th, 31st and 46th. Rya Berrigan's 3:42:35 places her in the 116-spot, and Jan Tomsen now occupies 178th position (as well as 160th). Tomsen helped bump her own time from 2017 off the list! Shalane Frost's performance was remarkable.

The list of bumpees is long: Maryellen Laberge (3:52:35 in 1995), the aforementioned Tomsen, Alison Meadow (3:52:46 in 2001), Gail Taylor (3:52:48 in 2008), Chloe Conlon (3:52:52 in 2018), Carol Coe (3:52:54 at age 14 46 years ago in 1975), Michelle Mitchell (3:52:57 in 1997), Tasha Thompson-Bergt (3:53:18 in 1985), Jenny Mahlen (3:53:21 in 2009) and Karen Williams (3:53:23 in 2005).

4.3. Fastest Debut Performances

The 2021 Equinox produced four of the six-fastest women's debut performances. In addition to Dalton, Rivard and Rhodes, sixth-place Shalane Frost of Fairbanks is now ranked number six on the women's debut list after her 3:22:52. In any year other than 2021, Frost's performance would have been one of the major topics of conversation after the race. Her time in this year's race would have won all but 12 of the previous 56 Equinox Marathons. Her time would have been second in all but two (2002, 2016) of the previous races, and she would have been comfortably on the podium in all of the Equinox Marathons prior to 2021. As it was, she did not even make the podium. She does have the distinction of being the fastest runner ever to not make the podium – by a margin of nearly 16 minutes.

Besides all the rearranging at the top of the list 8th-place Melanie Nussbaumer of Fairbanks posted the 17th-fastest ever debut with a 3:30:00, another time that would have made the podium in any Equinox Marathon other than the 2021 edition.

Not to be outdone (by much) former UAF skier and runner Lars Arneson posted the 7th-fastest debut among men, just ahead of some 30-plus year-old performances: Audun Endestad (2:52:37 in 1983), Guy Thibodeau (2:53:05 in 1982) and Ole Kristiansen (2:54:08 in 1991).

4.4. Graph of Winning Times

The graphs of men's and women's winning times have become remarkably smooth over the past 12-15 years, with only this year's dip in the women's graph and last year's dip in the men's graphs marking notable departures from recent trends.

4.5. Men under 3:00:00

Lars Arneson's winning time of 2:52:22 made him the 42nd runner to break 3:00:00 on the Equinox course. Those 42 runners have posted 93 sub-3:00 times.

4.6. Women Under 3:35 - 3:40 – 3:45

In prior years, this report has focused on women under the 3:45 mark. However, that performance level has become so commonplace that sub-3:45 performances by women are no longer considered noteworthy. The same can be said for sub-3:40. The closest comparison for women to the men's sub-3:00 is 3:35. Forty-two men have broken 3:00:00, and 36 women have equaled or broken 3:30:00. By 2022 or 2023, there will likely be more sub-3:35 women than sub 3:00 men. All of the first eight women ran sub-3:30 or better and are now on the list – their details are included elsewhere in this report. Katie Krehlik was the only one among those eight who had previously appeared on the list. She now is tied with Tina Devine, Melissa Lewis and Laura Brosius with four sub-3:35 performances, trailing only Christy Marvin's six and Jane LeBlond's five.

4.7. High-Quality Multi-Year/Consecutive Streaks

There were no changes to the multi-year consecutive streak report. Christy Marvin had to miss the race due to an injury so she will have to "start over" in this department, after having run superb times for four straight Equinoxes from 2016 through 2019.

5. Field Strength

5.1. Fastest Front of the Field

Although the men's field was not remarkable in this department, the women's field was. Prior to 2021, the most women under 3:20 in one race was 2 in 2002; this year there were 5. To continue, previous bests:

Under 3:25: previous 2 (2002, 2007, 2016), this year, 6
Under 3:30: previous 4 (2012, 2014, 2019), this year, 7
Under 3:35: previous 5 (2001, 2012), this year, 8
Under 3:40: previous 7 (2002, 2007), this year, 8
Under 3:45: previous 8 (2019) and 7 (2002, 2007, 2013), this year, 9
Under 4:00: previous 15 (2001), this year, 15

5.2. Benchmark Times – Table

Same commentary as 5.1

5.3. Benchmark Times – Graphs

Men: After a pretty consistent period from 2005 through 2018, the line showing sub-3:00 performances for men has dropped for the past two races. It remains to be seen if we are in a brief lull or a long dry spell.

Women: The past three races have produced remarkably steeply ascending slopes on the graph showing women's benchmark performances. We are in a period of remarkable performances on the women's side

5.4. Top 10 Times for each of the Top 10 Places

In what is likely a first for the women's race, each of the first 10 finishers now occupies first place in the rankings of finish times for that place. In 2002, eight of the first 10 women (all but 5th and 10th places) moved into first on this list. Ten of ten is amazing.

None of the first 10 men moved into the top 10 for their finish place, although Franklin Dekker, Alex Morris and Nicholas Rasmussen (places 8-10) are all ranked among the top 20 for their finish place.

5.5. Strength of Top 10 Finishers – Graph

The 2021 women's race joined the 2002 women's race as the only two races where all of the first 10 are on the all-time top 10 list for their finish rank. Nine of the first 10 from the 2007,

2012 and 2019 races are in the "top 10 top 10", and eight from the 2013 race.
On the men's side all of the first ten from the 1980, 1982, 1983 and 2012 races are still on the list. Over the past six races, only five men have made this list, the worst period since 2000-2008.

6. ***Historical***

6.1. All-Time Best Performers

The only notable action in this category was on the men's side, as Matias Saari cemented his position atop the "Who Da Man?" list with his 5th-place finish. In this ranking system, Matias has 112 points, 24 points ahead of 2nd ranked Stan Justice, another six-time champion. The only other six-time champ, Bob Murphy, is ranked third with 85 points. Allan Spangler's third place moved him up into 7th overall, out of a tie with Bill Gardner and Cody Priest, and ahead of two other two-time champions, Chris Haines and Nat Goodhue.
Anna Dalton moved into a tie for 38th place with a number of other one-time champions with her victory in 2021.

6.2. Legends of the Equinox

No one was added to the "Legends" category. Stan Justice added one more Equinox patch to his collection finishing in 5:01:04 – a nearly 45-minute improvement over his 2019 time. This was Stan's 13th finish time. Matias Saari now has 20 finish times listed courtesy of his 5th-place 3:16:20. Allan Spangler added a 3:03:43 after going sub-3:00 in his previous three Equinox races (2017-18-19).

6.3. Best Masters Performances

Among the masters runners adding to their Equinox palmares in 2021 were many recognizable names: Cody, Wyoming's Martha Brettell, age 68, who has come to Fairbanks for every race since the 2009 event, former Equinox Marathon and Ultramarathon champion Laura McDonough, multi-age-record holder Dorli McWayne, Erika VanFlein, Greg Finstad, Andy Holland, Stan Justice and Matias Saari.

6.4. The Best Never to Have Won

The only two runners on this list who competed in 2021 were Davya Flaharty who was 26th in 4:22:30, and Katie Krehlik who ran sub 3:30:00 but finished out of the first five for the first time in four races (2nd in 2015, 2nd in 2016, 3rd in 2019, 7th this year).

6.5. Multiple and Consecutive Finishes

Bad Bob Baker finally equalled Corky Hebard's 42 consecutive finishes, which had been a long time goal. Among known streaks, it looks like Andy Holland is next in line with 32 consecutive races from 1988 through 2021 (remember no races in 1992 or 2020). Tom Wickwire finished 36 races, but missed 2005 and 2008, so did not have a consecutive streak of 30 years or more.
Please note that, for the most part, data to generate this report is complete from 1997 to the present. Some results from races 1996 and earlier, when available, have been added to verify these streaks. We are working on adding data from earlier races to the Equinox database from which these reports are generated. Doing so is not trivial, nor is it quick!

Notes of Interest

- Christy Marvin's 2019 win marked her 4th consecutive win. Prior to that, only Stan Justice had won four straight. 2019 was also Christy's 6th win, equalling the totals of Justice, Bob Murphy and Matias Saari. By winning her sixth title in seven years, she also bested Justice's achievement of 6 wins in 8 years. Her wins include 2 course records

- After his wins in 2004, 2005 and 2006, Mike Kramer did not race in 2007, missing the opportunity to become only the second runner, male or female, to win four consecutive championships

- Stan Justice, from 1980 through 1987, won 6 titles in 8 years; in 1982 he finished 2nd, 1:20 behind Bob Murphy and in 1983 he finished 2nd, 1:08 behind Pat Cross

- Bob Murphy holds the record for the longest time between his first win and his final win -- 16 years between his first win in 1978 and his most recent win in 1994. Had he run 6 seconds faster in 1995, he would have defeated Tony Davies, and the record would be 17 years.

- Mari Shirazi (1994-1995), Tina Devine (1996-1998, 2003), Jane LeBlond (1999-2001), and Julie Udchachon (2004-2005) won 11 of the 12 races from 1994 through 2005. Susan Faulkner (1st in 2002) was the only other winner during

- The 13 female multiple winners have accounted for the victories in more than 2/3 of the Equinox Marathons held to date (39 of 57); Male multiple winners have accounted for 33 of 57 victories -- just less than 60%.

As might be expected when the first four finishers break the course record, a number of age-group records were broken at the 2021 race. Two of the records (Susan Faulkners 40-44 mark and Jane Leblond's 20-29 mark) had been set in the record-smashing 2002 race. Anna Dalton's course record 3:07:21 established a new mark for 30-34 women, erasing Christy Marvin's previous standard Marvin Still holds the 35-39 mark.. Meg Inokuma, who also broke the previous Christy Marvin course mark of 3:15:6 set a new 40-44 standard. Klaire Rhodes posted the best-ever time for 20-29 women. On the men's side, Fred Moore, who holds the records for ages 77, 78, 79 and (now) 81, broke Dale Feist's three-year-old 80+ record.

This graph displays the year-by-year age group records for women and for men. In addition to the actual data, the graph includes trend lines which show a smoother version of the data. As you can see, although there are some anomalous numbers at the old and young extremes of the age records, the 20-to-55-year old range is remarkably consistent.

Also, note that the trendlines for women and men nest nearly perfectly. This means that the peak performance years for women and for men are virtually the same: 30-40 is the narrowest part of the peak, and 27 to 42 or 43 a little broader peak. It's worth noting that the fastest times by women are mostly between ages 30 and 42, with a couple of mid-to-late 20s. Klaire Rhodes is the only runner under the age of 26 with a top 10 overall time. The top men's times cluster much more closely in the middle of the peak years. Other than Aaron Fletcher's age 27 course record of 2:36:13 and Pat Cross's third-fastest-ever 2:42:20 at age 23, the other five fastest times were recorded by Stan Justice between the ages of 31 and 37.

The difference between the sexes actually seems to increase with age. In the 20's, the typical difference is just over half an hour; by the time runners get to the late 40's, the difference gets closer to one hour. So, either we have very tough young women (or weak young men), or we have very tough old men (or weaker older women). It will be interesting to see if these curves change

‡ = Sub 3:30:00 Time

The 2021 women's field blew away any previously-held concepts of what constituted a fast women's field. Four women broke 3:15 and Christy Marvin's 3:15:06 course record. Five women were under 3:20. Six women ran faster than 3:25. Eight women ran 3:30 or faster. The 2021 field set a standard that will be hard to match. Please note that 9th-place Rya Berrigan also ran sub-3:45 - but we ran out of space on the page!

‡ = Sub 2:50:00 Time

The 2021 men's field was not among the strongest. Only the winner Lars Arneson, broke 3:00, with an excellent 3:52:52, 31st-fastest all time and the 7th-fastest debut time. After that, though the front of the field was decidedly middle-of-the-pack.

3. Benchmark Times Graphs

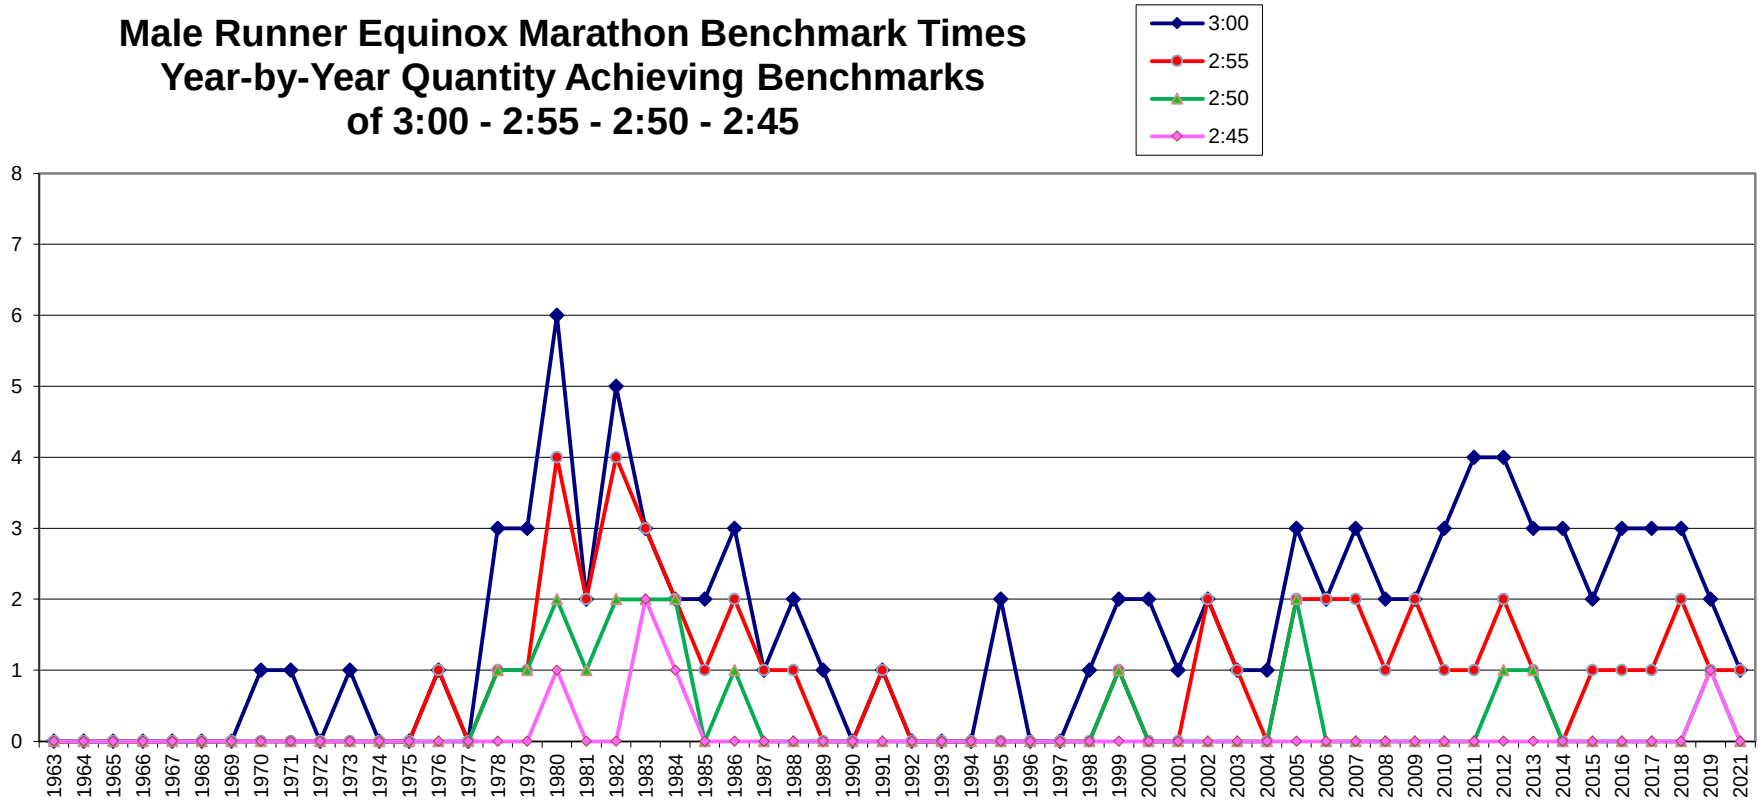
Men & Women

Male Runner Equinox Marathon Benchmark Times
Year-by-Year Quantity Achieving Benchmarks
of 3:00 - 2:55 - 2:50 - 2:45



This graph shows the number of men under 3:00, as well as under 2:55, 2:50 and 2:45 each year. Chris Haines was the first man to break 3 hours in the Equinox Marathon in 1970. There have been 50 Equinox Marathons since then (through 2019) yet 3:00 has only been broken 92 times in 50 years -- an average of less than twice per year.

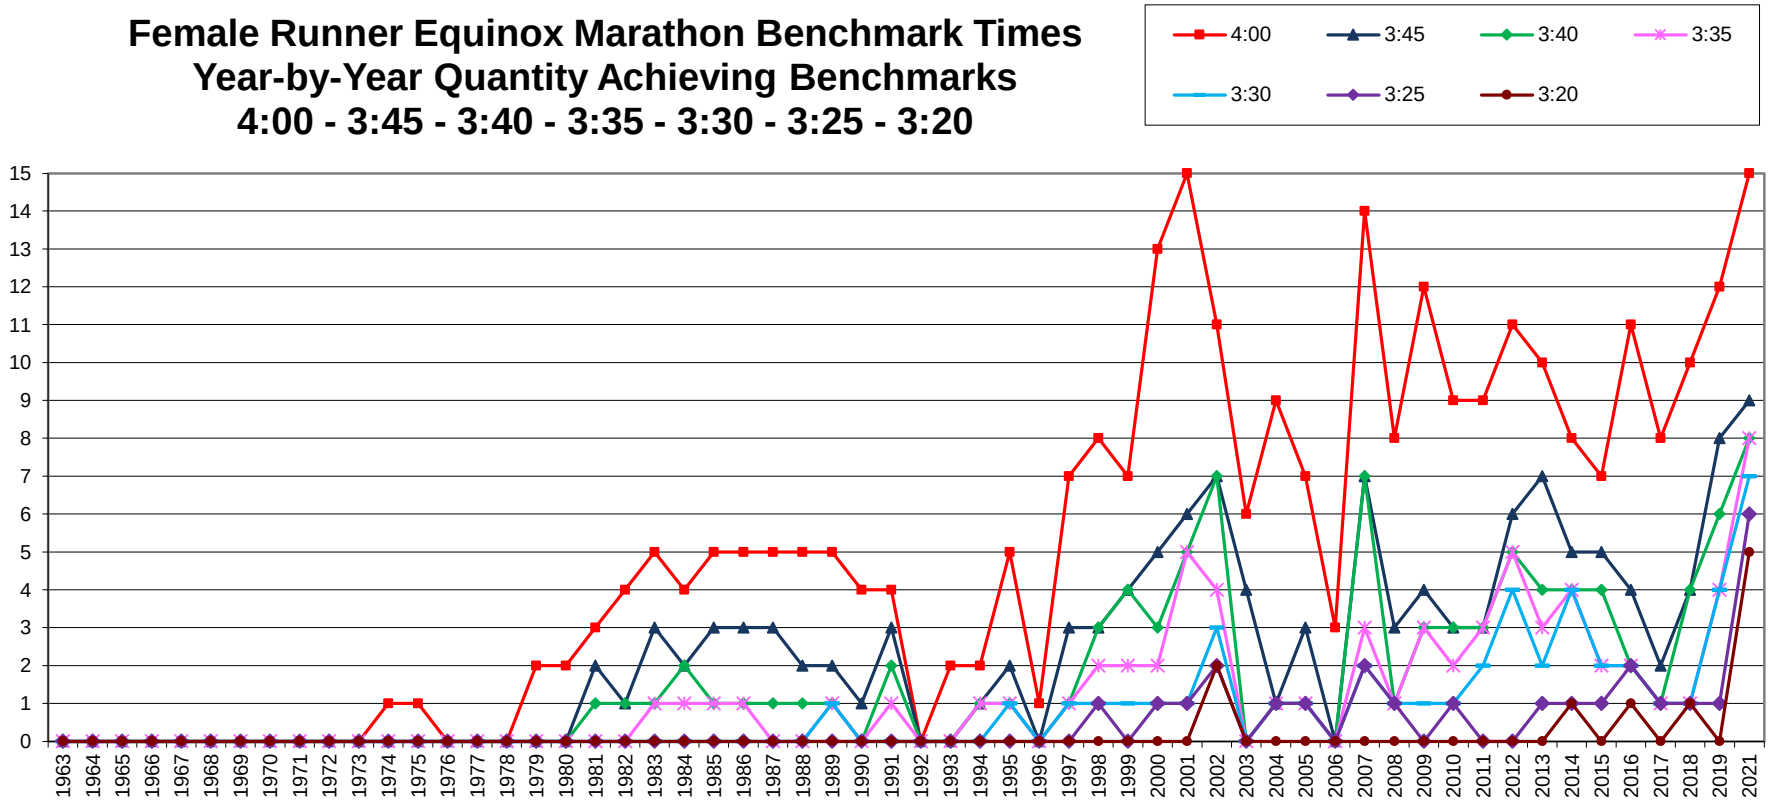
Other than a few blips in the late 70's and early 80's, the men's field has been pretty consistent, with zero runners, one runner(11 years) or two runners (13 years) or three runners (13 times) breaking 3:00:00 most years. Only twice have there been four men under 3:00:00, and only twice have there been more than four men under 3:00 (6 in 1980 and 5 in 1982). For men, 3:00:00 remains a meaningful, and quite elusive, barrier.

The number of times men have broken 2:50 through 2019 (18) is now comparable to the number of times men had broken 3:00 through the mid-80's (18 as of 1985, 19 through 1986). 2:50 has only been broken in 13 Equinox Marathons, 8 times by one runner and 5 times by 2 runners. There has never been a race with 3 runners under 2:50.

Since six-time champion Stan Justice broke 2:45 in 1980, that mark has only been beaten 5 times. That puts Aaron Fletcher's 2019 record of 2:38:13 in perspective. Stan justice set the previous record in 1984. The 35 years between record-breaking performances is far and away the longest stretch between record performances in either the men's or women's field.

Noteworthy breakthroughs for men:
1970 Chris Haines breaks 3:00
1978 Bob Murphy breaks 2:50
1980 Stan Justice breaks 2:45
2019 Aaron Fletcher breaks 3:40

Female Runner Equinox Marathon Benchmark Times
Year-by-Year Quantity Achieving Benchmarks
4:00 - 3:45 - 3:40 - 3:35 - 3:30 - 3:25 - 3:20



Until the mid-1980's, the women's benchmark equivalent to 3:00 for men was 4:00:00. However, while the difficulty men experienced in breaking 3:00:00 has not changed much, more and more women have broken 4:00:00, and 3:45, and 3:40, etc. In 1986, three hours had been broken 33 times, and four hours had been broken 32 times by women. By 1999, four hours had been broken by women more than twice as many times as three hours had been broken by men (87 times v. 43 times). Obviously, four hours for women is no longer the equivalent of three hours for men.

3:45:00 was a reasonable equivalent for a while, but that, too, proved to be somewhat of a moving target. In 2000 and 2001, the number of times men had broken three and women had broken 3:45:00 was about equivalent (45 men v. 43 women in 2000; 46 v. 47 in 2001). Through 2021, there have been 136 women's sub-3:45s and 93 men's sub-3:00's. Through this year's race, the closest equivalenc is at 3:40 -- there have been 94 women's times under 3:40 and 93 men's times under 3:00.

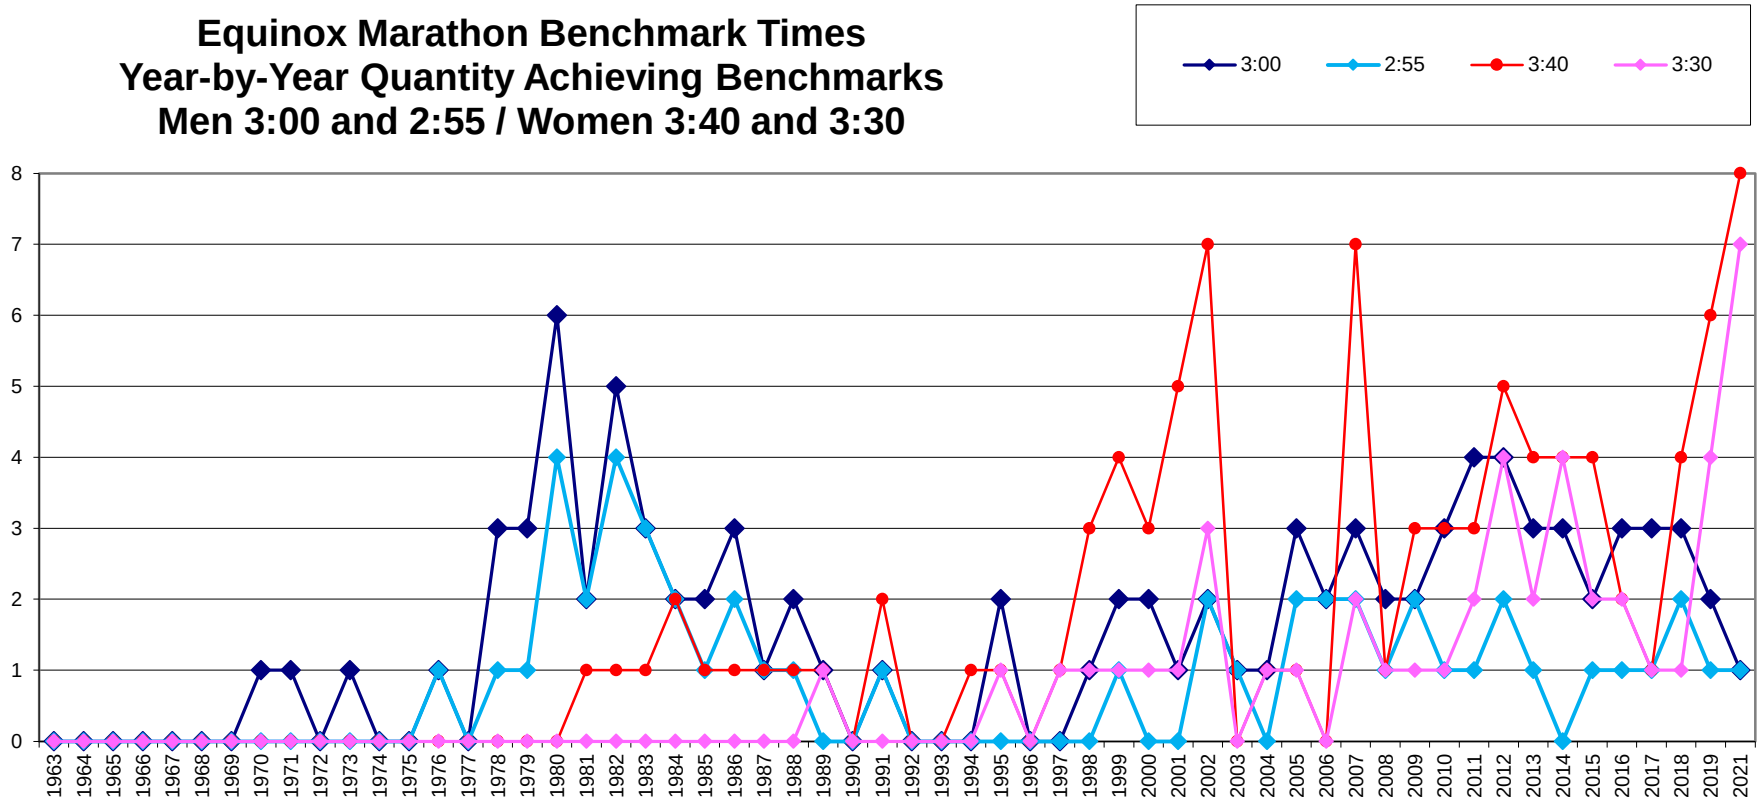
Another rough equivalent is 2:55 for men (49 such performances) and 3:30 for women (46 performances). As we look at times faster than 2:55 and 3:30, there are no natural equivalences.

One interesting note: in 1980 Pat Kling was the 5th woman to break 4:00:00 (after Mel Langdon, Carol Coe, Mara Rabinowitz and Helen Desinger). However, Pat was the first woman to break 3:45:00 and 3:40:00 (3:37:59 in 1981). In 1982, Pat missed, by 53 seconds, becoming the first woman to break 3:35:00. The very next year, 1983, Nancy Felix became the first woman to break 3:35:00 and nearly broke 3:30:00 (3:30:34). In 1989, Felix did become the first woman to break 3:30:00 with a 3:25:19. Tina Devine was the first to break 3:25:00 with a 3:21:21 in 1998. Susan Faulkner and Jane LeBlond became the only two sub-3:20:00 runners with their stirring duel in 2002, Faulkner winning the race in 3:18:16 to LeBlond's 3:19:59. The progression from sub-4:00 to sub 3:20 transpired over 21 races.

Beginning in 2014, Christy Marvin made breaking 3:15 look more and more likely, missing only by 7 seconds in 2018. Despite sub-3:20's becoming more common, 18 races and 19 years would pass between the first sub-3:20 and the first sub-3:15. This year, the first four women all broke 3:15, with the champion, Anna Dalton, breaking 3:10, a truly remarkable performance. 2021 will be a difficult year to beat for fast women's times.

Noteworthy Breakthroughs for Women

1974	Mel Langdon breaks 4:00	1981	Pat Kling breaks 3:45 and 3:40
1983	Nancy Felix breaks 3:35	1989	Nancy Felix breaks 3:30
1998	Tina Devine breaks 3:25	2002	Susan Faulkner breaks 3:20
2021	Anna Dalton breaks 3:15 ***AND*** 3:10		



My purpose in generating this graph was to try to see if there is a female time equivalent to the men's "benchmark" time of 3:00:00, or if there are any other benchmarks that are similar between men and women in terms of the number of runners who have surpassed the benchmark. This is a moving target because more and more women are surpassing what used to be rarely-beaten benchmarks. Currently, the best equivalents are 3:00 for men and 3:40 for women, and 2:55 for men and 3:30 for women. Those numbers are shown in the graph above.

Until the mid-1980's, the women's benchmark equivalent to 3:00 for men was 4:00:00. However, while the difficulty men experienced in breaking 3:00:00 has not changed much, more and more women have broken 4:00:00, and 3:45, and 3:40, etc. In 1986, three hours had been broken 33 times, and four hours had been broken 32 times by women. In 2000 and 2001, the number of times men had broken three and women had broken 3:45:00 was about equivalent (45 men v. 43 women in 2000; 46 v. 47 in 2001). Through 2021, there have been 136 women's sub-3:45s and 93 men's sub-3:00's.

Through 2021, the 3:00 barrier has been broken 93 times by men, and the 3:40 standard has been broken 94 times by women. There have been 49 men's performances under 2:55, and 46 women's times under 3:30. Things are pretty equal, for now, at those break points However, as you can see by the graph, there have been far more women's benchmark performances in recent years than is the case with men.

If the 2021 race is a preview of things to come in the women's field, the benchmark times will need to be recalcllated as more and more women run very fast times, and the "equivaliencies" are sure to change as well.

Section 5 – Field Strength

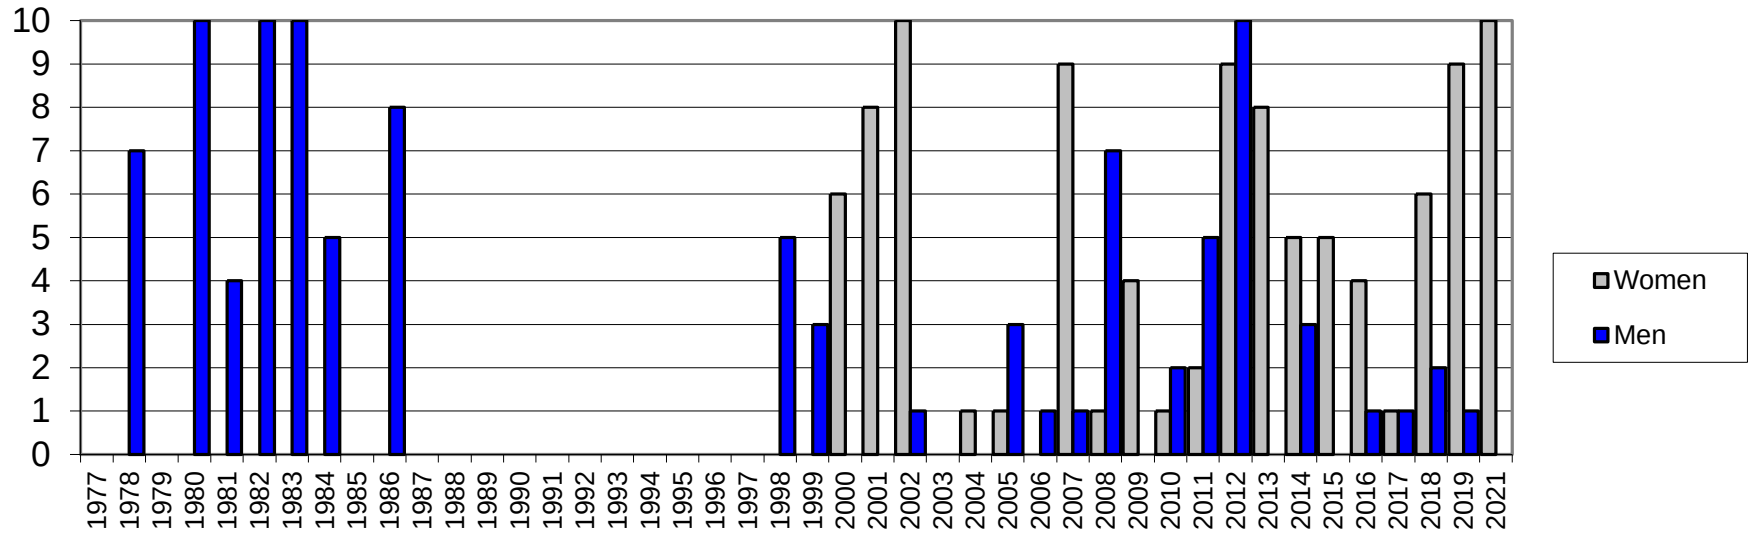
3. Strength of Top 10 Finishers - Graph

What Are the True Glory Years of the Equinox Marathon?
Number of Performances per Year in 10 Fastest All-Time Top 10



The graph above shows how many of the times for the first 10 finishers in a given year are still among the 10 fastest times for one of the top 10 places. The entire men's top 10 are on this list from 1980, 1982, 1983 and 2012; for women, the whole top 10 have made this list two times: 2002 and 2021, and nine of the top 10 in 2007, 2012 and 2019. That is a sign of not just a fast race, but a deep field. All the women in the top 10 in the 2021 race not only made the list, but each of them holds the fastest time for their finish place.

As you can see, the "glory years" for the men were from 1978 through 1986. In that 9 year period, runners recorded 54% of the 10 fastest times for the top 10 places. Included in that period was the "snow year" of 1985 when times were slow. Some hot performances in 1998 and 1999 gave hope that another "glory years" era was on the way on the men's side, but other than the 2008-2012 period where 24 top-10 times were recorded, a second "glory years" era has not occured. The first three finishers in the 2005 race (Kramer, Saari, Brinegar) all posted times among the all-time top 10 for their finish positions. The 2008 race was the first time in 22 years that eight or more men recorded all-time top 10 times, only 7 of which remain among the "top 10-top 10". The 2012 race was the the first race in 29 years with all of the first 10 finishers earning positions on the list. The 2018 race saw only two men move into the all-time top 10 for their position, but that was actually quite a strong year, as all of the first 10 finishers were among the top 17 for their respective finish places.

The 1998 and 1999 races were very strong for the women, but all of those times have since been bumped from the list. The three-year period of 2000-2001-2002 was second only to the past three races (2018, 2019, 2021). In the 00-01-02 period 24 of the times (out of a possible 30) are on the list; 25 times from 18-19-21 are on the list. Frpm 2000 through 2007 a series of strong fields produced 35 times on this list. After a lull from 2008-2011, things really picked up begining with the 2012 race. Almost half of the times on the list (47 of 100) have come in the 2012-2021 period.

Stan Justice has 6 times on this list, Matias Saari, Cody Priest and Everett Rubel four each, and Dave Bloom, Kevin Brinegar, Mike Kramer and Bob Murphy 3 each. Among women, record-holder Christy Marvin and Davya Flaharty both have 5 times on the list, Erika Burr, Tina Devine and Laura McDonough have 4 times each, and six runners, Susan Faulkner, Katie Krehlik, Kinsey Laine, Melissa Lewis, Kristen Rozell, and Christi Schmitz, have 3 times each on this list. Between the men and the women 19 times from 2012 are on this list, the highest number for any single year.

4. The Best Never to Have Won

Equinox Marathon - Close But No Cigar
The Best Runners Never to Win the Equinox Marathon

There are a number of outstanding runners who have run fast times and had high finishes, but who have never made it to the top step of the Equinox Marathon awards podium. Below are listed the Equinox Marathon histories of what I believe to be the best runners who have never won.

To winnow things down a little, I applied these standards: Women: must have finished in the top four at least twice, and/or must have run sub-3:50:00 at least three times or run sub-3:30:00 at least twice; Men: must have finished in the top four at least twice, and must have run under 3:05:00 at least twice.

These standards eliminated female runners Linda Huyck (3:28:17 in 2002), Kat Betters (3:30:34 in 2001), three-time runner up Barb Page (1969-70-71) and Mary Ellen Laberge (2nd, 2x3rd and 5th between 1988 and 1995). Among men, Audun Endestad (2:52:47 in 1983) and Guy Thibodeau (2:53:05 in 1982), not to mention two-time runner-up Donn Wells (1976-77) and Forrest May (4th-3rd-2nd in 1972-73-74) were eliminated.

Take a look at the records, and you can debate who are the best of the best never to have won.

Notes on Items of Statistical and Historical Interest

Below are notes on statistically or historically interesting items drawn from this year's Equinox Marathon. These notes are organized in the same structure and order as the statistical reports that follow. You can read this section and skip the statistical reports and graphs, or use this as a guide to find the items that interest you.

1. Champions

1.1. Champions Year-by-Year
Anna Dalton and Lars Arneson, two 31-year-olds from Anchorage, became the 57th champions of the Equinox Marathon, Dalton smashing the existing record in the process.

1.2. Margins of Victory
Dalton's victory margin of 4:35 over Megan Youngren was the 22nd closest finish on the women's side. Arneson's winning gap of 9:14 over Tobias Albrigtsen was among the 10 largest in the races history. It was only one second closer than the 8th-closest, Stan Justice's 1986 win over Mike Johnson by a margin of 9:15.

1.3. Fastest to Slowest Winners
Arneson was the 23rd-fastest winner of the men's race. Dalton moved to the top of the list with her record-breaking performance.

1.4. Youngest to Oldest Champions
Both winners landed right in the middle of this list – Dalton 29th-youngest and 29th-oldest, and Arneson 27th-youngest and 30th-oldest. Early 30's is clearly the prime age to be an Equinox Champion.

1.5. Multiple and Consecutive Winners
There were no changes to our list of multiple and consecutive winners

2. Podiums

2.1. Year-by-Year Podiums with Times
On the men's side there were three first-time podium finishers (Arneson, Albrigtsen, Max Donaldson) and two repeat offenders (Allan Spangler, Matias Saari). On the ultra-fast women's side, all of the first five runners were making their first visit to the Equinox podium.

2.2. List of Runners with Podium Finishes
Saari's late-race surge onto the podium increased his dominance in the category of most times on the Equinox podium – it was his 17th time on the podium. If he can finish third one more time he will have two complete "table settings" of plates. He has 6 wins, 6 runner-up finishes, 2 fourth-place finishes and 2 fifth-place finishes, but only 1 third place.

2.3. Average of Podium Finishers Times
The women's race was remarkably fast with the first four runners breaking the course record, and the fifth-place finisher only about 90 seconds slower than the record. With so many fast times, the average time of the five women on the podium was by far the fastest-ever: 14:12 faster than the very fast 2002 race, when the first two women (Susan Faulkner and Jane

LeBlond) broke the existing course record.
The men's podium finishers were not as fast as a group. Their average time 3:04:20) was the 31st-fastest among 57 races, and was the slowest since 2004's 3:07:19.

2.4. Average Ages of Podium Finishers
There was nothing remarkable about the average ages of the podium finishers for either sex, although the men's average would have been considerably below the long-term average had not 51-year-old Matias Saari not become the oldest podium finisher ever. Both podiums averaged within one year of the long-term average age for their respective genders.

3. Records

3.1. Course Record Progression
After a 12-year gap between women's course records (Susan Faulkner's 3:18:16 in 2002 until Christy Marvin's 3:17:09 in 2014), the women's record has been broken three times in the last seven runnings of the Equinox: Marvin in 2014, Marvin again with 3:15:06 in 2018, and Dalton's 3:07:21 this year. The women's record was broken four times in the seven-year period from 1982 through 1989, and six times from the 1979 race through the 1989 race. Dalton's margin over the existing record of 7:45 was the biggest difference between old and new records since Pat Kling 3:37:59 in 1981 broke Mara Rabinowitz's 1979 record of 3:48:40 by 10:41.

3.2. Age-Group Records
Four new age group records were established in the 2021 race:
Women 20-29 – Klaire Rhodes' 3:16:25 broke Jane LeBlond's 19-year-old record of 3:19:59 which was the second-fastest women's time ever at that point.
Women 30-34 – Anna Dalton smashed Christy Marvin's record by nearly 10 minutes. Marvin still holds the women's 35-39 age group record.
Women 40-49 – Meg Inokuma erased another 19-year-old mark, Susan Faulkner's 2002 then course record of 3:18:16
Men 80+ - Fred Moore's 6:41:45 topped Dale Feist's 2018 record by almost 95 minutes. Fred Moore now holds age records for 77, 78, 79 and 81. He would probably have the record for 80-year-olds had the Equinox been held in 2020.

3.3. Year-by-Year Age Records
2021 was a banner year for age records, with four records established on the men's side and nine in the women's race. Complete details are in the report. Highlights:
Each of the first five women: Dalton (31), Youngren (30), Susanna Rivard (34), Meg Inokuma (41) and Klaire Rhodes (23) set a record for her age. Dorli McWayne posted a new mark for age 68. She also holds the records for ages 51, 52, 53, 56, 57, 59, 62, 64 and 65. The closest any runner is to her 10 age records is Matias Saari who holds nine age records 39, 40, 41, 42, 43, 44, 45, 46 and 49. Stan Justice and the late Jim Madonna hold six each.
In the men's race all the action took place among the senior citizens. Greg Finstad showed his recovery from COVID is coming along nicely with an age-66 record, Terry Honeysett added an age 69 record to the age 67 record he set two years ago, Pete Hjellen made up for losing the age 69 record to Terry Honeysett by picking up the age 76 record with a 6:38:34 at the expense of Nobuhar Kohara. Fred Moore established an age 81 record of 6:41:45 – there was no previous age 81 mark.

3.4. A list of all times for each age
If you are really curious about where you stack up, at the end of this booklet is an appendix with all times for each age (ages that we know – there are a few unknown ages) with data from 1997 to the present.

4. ***Times***

4.1. 30 Fastest Women and Men

This year I increased the number of runners on this list from 25 to 30 because it seems like there are so many worthy times. The list of the 30 fastest women underwent an unprecedented rewriting, with seven of the first eight women (Dalton, Youngren, Rivard, Inokuma, Rhodes and Fairbanksans Shalane Frost and Melanie Nussbaumer) making their first appearance on the list, and Katie Krehlik remaining on the list after earning her spot with a 3:25:35 at age 25 in 2015.

4.2. The 200 Best Times for Each Gender

This list used to be the top 100 times for each gender, but there have been so many fast times since I first started the list that it seems a cutoff of 200 is more appropriate. The first four men (Arneson 31st, Albrigtsen 113th, Spangler 142nd, Donaldson 191st) all made the top 200. Spangler also holds the 19th and 34th fastest times on the list. Displaced from the men's top 200 were Corky Hebard (3:08:58 in 1981), Steve Humpel (3:8:58 in 2010), Jonathan Chaffee (3:19:17 in 1967 – 54 years ago!) and Mike Scanlan (3:9:27 in 1982)

All of the first 10 women made the list and had it not been for so many fast runners ahead of her in this year's race, 11th place Jennifer Love would have made the list with her 3:52:46, which places her 204th among women. Dalton, Youngren, Rivard, Inokuma and Rhodes now occupy positions 1-2-3-4-6 on the list. Shalane Frost (6th this year) posted the 20th-fastest time ever. Seventh and eighth-place finishers Katie Krehlik and Melanie Nussbaumer now rank 46th and 47th. Krehlik now occupies four positions on page one of this list: 11th, 29th, 31st and 46th. Rya Berrigan's 3:42:35 places her in the 116-spot, and Jan Tomsen now occupies 178th position (as well as 160th). Tomsen helped bump her own time from 2017 off the list! Shalane Frost's performance was remarkable.

The list of bumpees is long: Maryellen Laberge (3:52:35 in 1995), the aforementioned Tomsen, Alison Meadow (3:52:46 in 2001), Gail Taylor (3:52:48 in 2008), Chloe Conlon (3:52:52 in 2018), Carol Coe (3:52:54 at age 14 46 years ago in 1975), Michelle Mitchell (3:52:57 in 1997), Tasha Thompson-Bergt (3:53:18 in 1985), Jenny Mahlen (3:53:21 in 2009) and Karen Williams (3:53:23 in 2005).

4.3. Fastest Debut Performances

The 2021 Equinox produced four of the six-fastest women's debut performances. In addition to Dalton, Rivard and Rhodes, sixth-place Shalane Frost of Fairbanks is now ranked number six on the women's debut list after her 3:22:52. In any year other than 2021, Frost's performance would have been one of the major topics of conversation after the race. Her time in this year's race would have won all but 12 of the previous 56 Equinox Marathons. Her time would have been second in all but two (2002, 2016) of the previous races, and she would have been comfortably on the podium in all of the Equinox Marathons prior to 2021. As it was, she did not even make the podium. She does have the distinction of being the fastest runner ever to not make the podium – by a margin of nearly 16 minutes.

Besides all the rearranging at the top of the list 8th-place Melanie Nussbaumer of Fairbanks posted the 17th-fastest ever debut with a 3:30:00, another time that would have made the podium in any Equinox Marathon other than the 2021 edition.

Not to be outdone (by much) former UAF skier and runner Lars Arneson posted the 7th-fastest debut among men, just ahead of some 30-plus year-old performances: Audun Endestad (2:52:37 in 1983), Guy Thibodeau (2:53:05 in 1982) and Ole Kristiansen (2:54:08 in 1991).

4.4. Graph of Winning Times

The graphs of men's and women's winning times have become remarkably smooth over the past 12-15 years, with only this year's dip in the women's graph and last year's dip in the men's graphs marking notable departures from recent trends.

4.5. Men under 3:00:00

Lars Arneson's winning time of 2:52:22 made him the 42nd runner to break 3:00:00 on the Equinox course. Those 42 runners have posted 93 sub-3:00 times.

4.6. Women Under 3:35 - 3:40 – 3:45

In prior years, this report has focused on women under the 3:45 mark. However, that performance level has become so commonplace that sub-3:45 performances by women are no longer considered noteworthy. The same can be said for sub-3:40. The closest comparison for women to the men's sub-3:00 is 3:35. Forty-two men have broken 3:00:00, and 36 women have equaled or broken 3:30:00. By 2022 or 2023, there will likely be more sub-3:35 women than sub 3:00 men. All of the first eight women ran sub-3:30 or better and are now on the list – their details are included elsewhere in this report. Katie Krehlik was the only one among those eight who had previously appeared on the list. She now is tied with Tina Devine, Melissa Lewis and Laura Brosius with four sub-3:35 performances, trailing only Christy Marvin's six and Jane LeBlond's five.

4.7. High-Quality Multi-Year/Consecutive Streaks

There were no changes to the multi-year consecutive streak report. Christy Marvin had to miss the race due to an injury so she will have to "start over" in this department, after having run superb times for four straight Equinoxes from 2016 through 2019.

5. Field Strength

5.1. Fastest Front of the Field

Although the men's field was not remarkable in this department, the women's field was. Prior to 2021, the most women under 3:20 in one race was 2 in 2002; this year there were 5. To continue, previous bests:

Under 3:25: previous 2 (2002, 2007, 2016), this year, 6
Under 3:30: previous 4 (2012, 2014, 2019), this year, 7
Under 3:35: previous 5 (2001, 2012), this year, 8
Under 3:40: previous 7 (2002, 2007), this year, 8
Under 3:45: previous 8 (2019) and 7 (2002, 2007, 2013), this year, 9
Under 4:00: previous 15 (2001), this year, 15

5.2. Benchmark Times – Table

Same commentary as 5.1

5.3. Benchmark Times – Graphs

Men: After a pretty consistent period from 2005 through 2018, the line showing sub-3:00 performances for men has dropped for the past two races. It remains to be seen if we are in a brief lull or a long dry spell.

Women: The past three races have produced remarkably steeply ascending slopes on the graph showing women's benchmark performances. We are in a period of remarkable performances on the women's side

5.4. Top 10 Times for each of the Top 10 Places

In what is likely a first for the women's race, each of the first 10 finishers now occupies first place in the rankings of finish times for that place. In 2002, eight of the first 10 women (all but 5th and 10th places) moved into first on this list. Ten of ten is amazing.

None of the first 10 men moved into the top 10 for their finish place, although Franklin Dekker, Alex Morris and Nicholas Rasmussen (places 8-10) are all ranked among the top 20 for their finish place.

5.5. Strength of Top 10 Finishers – Graph

The 2021 women's race joined the 2002 women's race as the only two races where all of the first 10 are on the all-time top 10 list for their finish rank. Nine of the first 10 from the 2007,

2012 and 2019 races are in the "top 10 top 10", and eight from the 2013 race.
On the men's side all of the first ten from the 1980, 1982, 1983 and 2012 races are still on the list. Over the past six races, only five men have made this list, the worst period since 2000-2008.

6. ***Historical***

6.1. All-Time Best Performers

The only notable action in this category was on the men's side, as Matias Saari cemented his position atop the "Who Da Man?" list with his 5th-place finish. In this ranking system, Matias has 112 points, 24 points ahead of 2nd ranked Stan Justice, another six-time champion. The only other six-time champ, Bob Murphy, is ranked third with 85 points. Allan Spangler's third place moved him up into 7th overall, out of a tie with Bill Gardner and Cody Priest, and ahead of two other two-time champions, Chris Haines and Nat Goodhue.
Anna Dalton moved into a tie for 38th place with a number of other one-time champions with her victory in 2021.

6.2. Legends of the Equinox

No one was added to the "Legends" category. Stan Justice added one more Equinox patch to his collection finishing in 5:01:04 – a nearly 45-minute improvement over his 2019 time. This was Stan's 13th finish time. Matias Saari now has 20 finish times listed courtesy of his 5th-place 3:16:20. Allan Spangler added a 3:03:43 after going sub-3:00 in his previous three Equinox races (2017-18-19).

6.3. Best Masters Performances

Among the masters runners adding to their Equinox palmares in 2021 were many recognizable names: Cody, Wyoming's Martha Brettell, age 68, who has come to Fairbanks for every race since the 2009 event, former Equinox Marathon and Ultramarathon champion Laura McDonough, multi-age-record holder Dorli McWayne, Erika VanFlein, Greg Finstad, Andy Holland, Stan Justice and Matias Saari.

6.4. The Best Never to Have Won

The only two runners on this list who competed in 2021 were Davya Flaharty who was 26th in 4:22:30, and Katie Krehlik who ran sub 3:30:00 but finished out of the first five for the first time in four races (2nd in 2015, 2nd in 2016, 3rd in 2019, 7th this year).

6.5. Multiple and Consecutive Finishes

Bad Bob Baker finally equalled Corky Hebard's 42 consecutive finishes, which had been a long time goal. Among known streaks, it looks like Andy Holland is next in line with 32 consecutive races from 1988 through 2021 (remember no races in 1992 or 2020). Tom Wickwire finished 36 races, but missed 2005 and 2008, so did not have a consecutive streak of 30 years or more.
Please note that, for the most part, data to generate this report is complete from 1997 to the present. Some results from races 1996 and earlier, when available, have been added to verify these streaks. We are working on adding data from earlier races to the Equinox database from which these reports are generated. Doing so is not trivial, nor is it quick!

Notes of Interest

- Christy Marvin's 2019 win marked her 4th consecutive win. Prior to that, only Stan Justice had won four straight. 2019 was also Christy's 6th win, equalling the totals of Justice, Bob Murphy and Matias Saari. By winning her sixth title in seven years, she also bested Justice's achievement of 6 wins in 8 years. Her wins include 2 course records

- After his wins in 2004, 2005 and 2006, Mike Kramer did not race in 2007, missing the opportunity to become only the second runner, male or female, to win four consecutive championships

- Stan Justice, from 1980 through 1987, won 6 titles in 8 years; in 1982 he finished 2nd, 1:20 behind Bob Murphy and in 1983 he finished 2nd, 1:08 behind Pat Cross

- Bob Murphy holds the record for the longest time between his first win and his final win -- 16 years between his first win in 1978 and his most recent win in 1994. Had he run 6 seconds faster in 1995, he would have defeated Tony Davies, and the record would be 17 years.

- Mari Shirazi (1994-1995), Tina Devine (1996-1998, 2003), Jane LeBlond (1999-2001), and Julie Udchachon (2004-2005) won 11 of the 12 races from 1994 through 2005. Susan Faulkner (1st in 2002) was the only other winner during

- The 13 female multiple winners have accounted for the victories in more than 2/3 of the Equinox Marathons held to date (39 of 57); Male multiple winners have accounted for 33 of 57 victories -- just less than 60%.

As might be expected when the first four finishers break the course record, a number of age-group records were broken at the 2021 race. Two of the records (Susan Faulkners 40-44 mark and Jane Leblond's 20-29 mark) had been set in the record-smashing 2002 race. Anna Dalton's course record 3:07:21 established a new mark for 30-34 women, erasing Christy Marvin's previous standard Marvin Still holds the 35-39 mark.. Meg Inokuma, who also broke the previous Christy Marvin course mark of 3:15:6 set a new 40-44 standard. Klaire Rhodes posted the best-ever time for 20-29 women. On the men's side, Fred Moore, who holds the records for ages 77, 78, 79 and (now) 81, broke Dale Feist's three-year-old 80+ record.

This graph displays the year-by-year age group records for women and for men. In addition to the actual data, the graph includes trend lines which show a smoother version of the data. As you can see, although there are some anomalous numbers at the old and young extremes of the age records, the 20-to-55-year old range is remarkably consistent.

Also, note that the trendlines for women and men nest nearly perfectly. This means that the peak performance years for women and for men are virtually the same: 30-40 is the narrowest part of the peak, and 27 to 42 or 43 a little broader peak. It's worth noting that the fastest times by women are mostly between ages 30 and 42, with a couple of mid-to-late 20s. Klaire Rhodes is the only runner under the age of 26 with a top 10 overall time. The top men's times cluster much more closely in the middle of the peak years. Other than Aaron Fletcher's age 27 course record of 2:36:13 and Pat Cross's third-fastest-ever 2:42:20 at age 23, the other five fastest times were recorded by Stan Justice between the ages of 31 and 37.

The difference between the sexes actually seems to increase with age. In the 20's, the typical difference is just over half an hour; by the time runners get to the late 40's, the difference gets closer to one hour. So, either we have very tough young women (or weak young men), or we have very tough old men (or weaker older women). It will be interesting to see if these curves change

‡ = Sub 3:30:00 Time

The 2021 women's field blew away any previously-held concepts of what constituted a fast women's field. Four women broke 3:15 and Christy Marvin's 3:15:06 course record. Five women were under 3:20. Six women ran faster than 3:25. Eight women ran 3:30 or faster. The 2021 field set a standard that will be hard to match. Please note that 9th-place Rya Berrigan also ran sub-3:45 - but we ran out of space on the page!

‡ = Sub 2:50:00 Time

The 2021 men's field was not among the strongest. Only the winner Lars Arneson, broke 3:00, with an excellent 3:52:52, 31st-fastest all time and the 7th-fastest debut time. After that, though the front of the field was decidedly middle-of-the-pack.

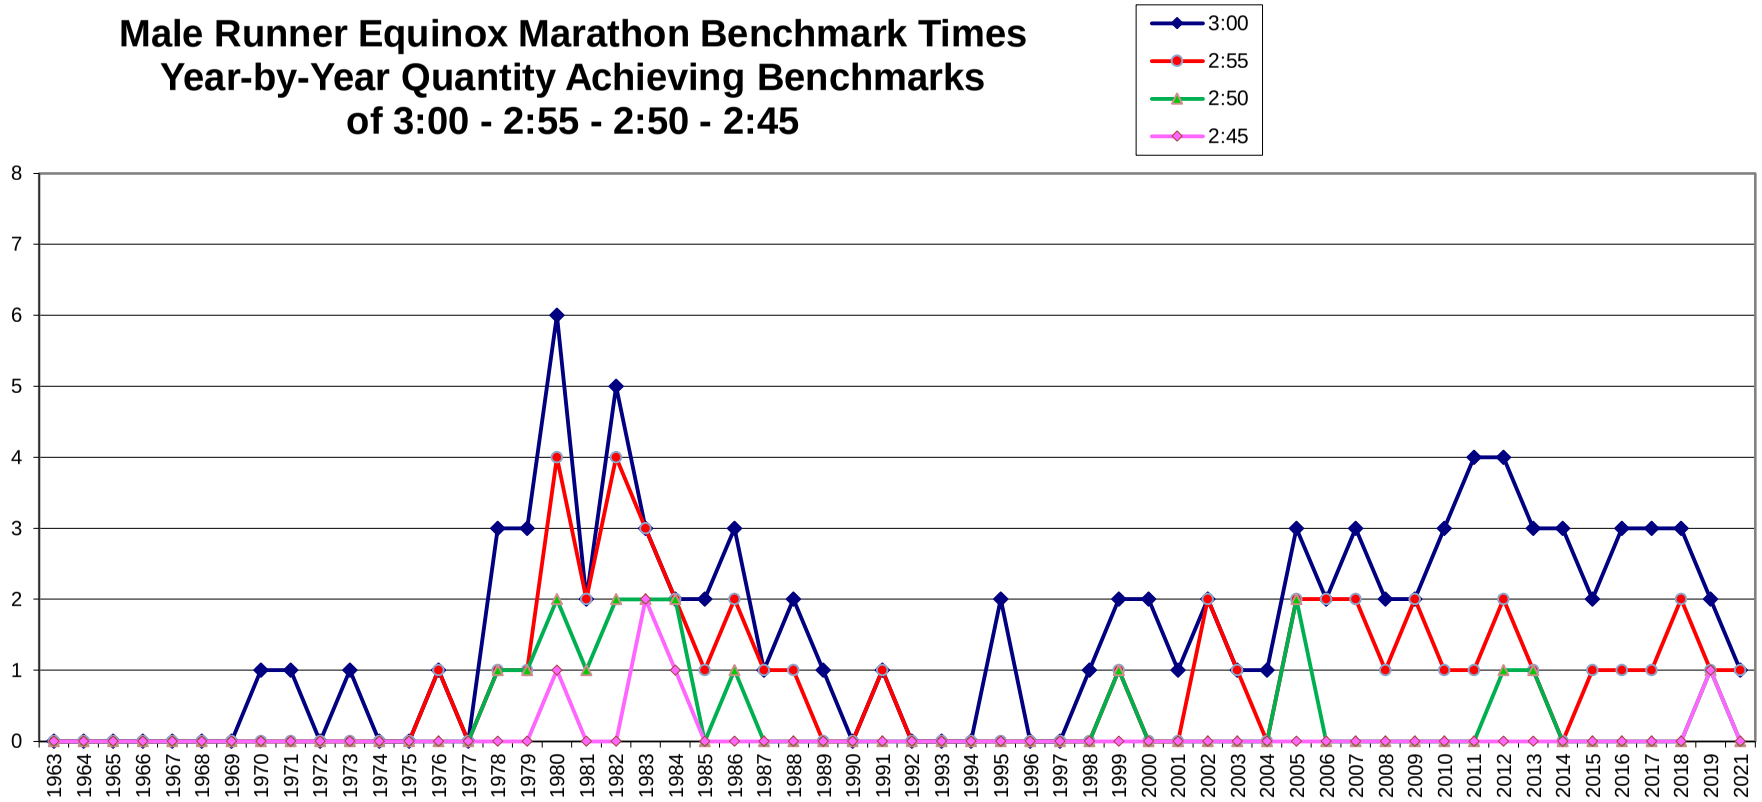
Male Runner Equinox Marathon Benchmark Times
Year-by-Year Quantity Achieving Benchmarks
of 3:00 - 2:55 - 2:50 - 2:45



This graph shows the number of men under 3:00, as well as under 2:55, 2:50 and 2:45 each year. Chris Haines was the first man to break 3 hours in the Equinox Marathon in 1970. There have been 50 Equinox Marathons since then (through 2019) yet 3:00 has only been broken 92 times in 50 years -- an average of less than twice per year.

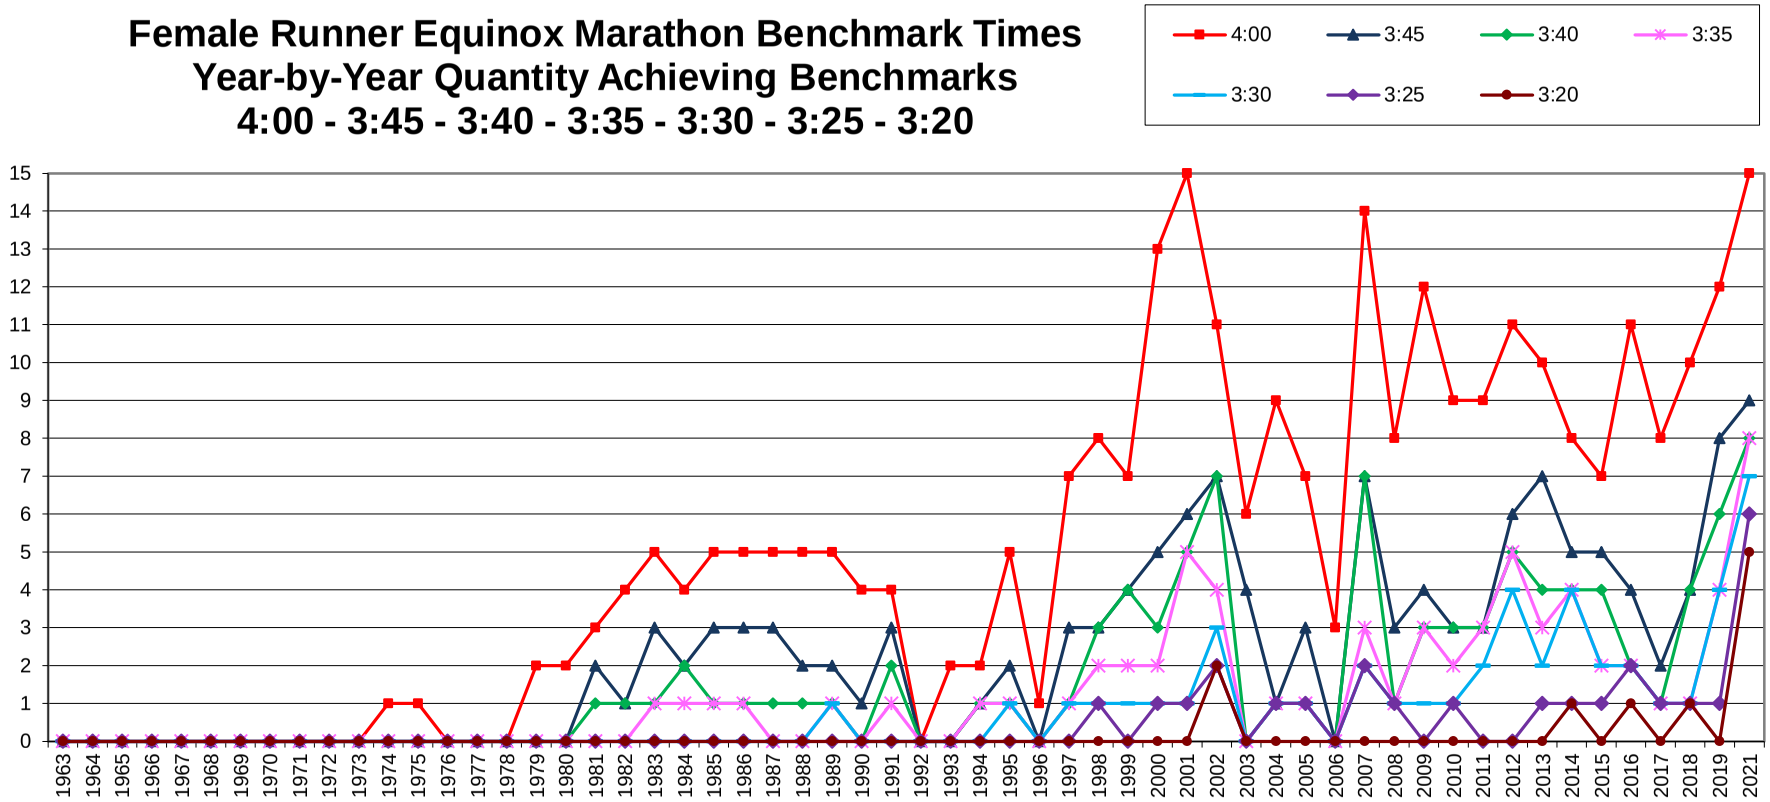
Other than a few blips in the late 70's and early 80's, the men's field has been pretty consistent, with zero runners, one runner(11 years) or two runners (13 years) or three runners (13 times) breaking 3:00:00 most years. Only twice have there been four men under 3:00:00, and only twice have there been more than four men under 3:00 (6 in 1980 and 5 in 1982). For men, 3:00:00 remains a meaningful, and quite elusive, barrier.

The number of times men have broken 2:50 through 2019 (18) is now comparable to the number of times men had broken 3:00 through the mid-80's (18 as of 1985, 19 through 1986). 2:50 has only been broken in 13 Equinox Marathons, 8 times by one runner and 5 times by 2 runners. There has never been a race with 3 runners under 2:50.

Since six-time champion Stan Justice broke 2:45 in 1980, that mark has only been beaten 5 times. That puts Aaron Fletcher's 2019 record of 2:38:13 in perspective. Stan justice set the previous record in 1984. The 35 years between record-breaking performances is far and away the longest stretch between record performances in either the men's or women's field.

Noteworthy breakthroughs for men:
1970 Chris Haines breaks 3:00
1978 Bob Murphy breaks 2:50
1980 Stan Justice breaks 2:45
2019 Aaron Fletcher breaks 3:40

Female Runner Equinox Marathon Benchmark Times
Year-by-Year Quantity Achieving Benchmarks
4:00 - 3:45 - 3:40 - 3:35 - 3:30 - 3:25 - 3:20



Until the mid-1980's, the women's benchmark equivalent to 3:00 for men was 4:00:00. However, while the difficulty men experienced in breaking 3:00:00 has not changed much, more and more women have broken 4:00:00, and 3:45, and 3:40, etc. In 1986, three hours had been broken 33 times, and four hours had been broken 32 times by women. By 1999, four hours had been broken by women more than twice as many times as three hours had been broken by men (87 times v. 43 times). Obviously, four hours for women is no longer the equivalent of three hours for men.

3:45:00 was a reasonable equivalent for a while, but that, too, proved to be somewhat of a moving target. In 2000 and 2001, the number of times men had broken three and women had broken 3:45:00 was about equivalent (45 men v. 43 women in 2000; 46 v. 47 in 2001). Through 2021, there have been 136 women's sub-3:45s and 93 men's sub-3:00's. Through this year's race, the closest equivalenc is at 3:40 -- there have been 94 women's times under 3:40 and 93 men's times under 3:00.

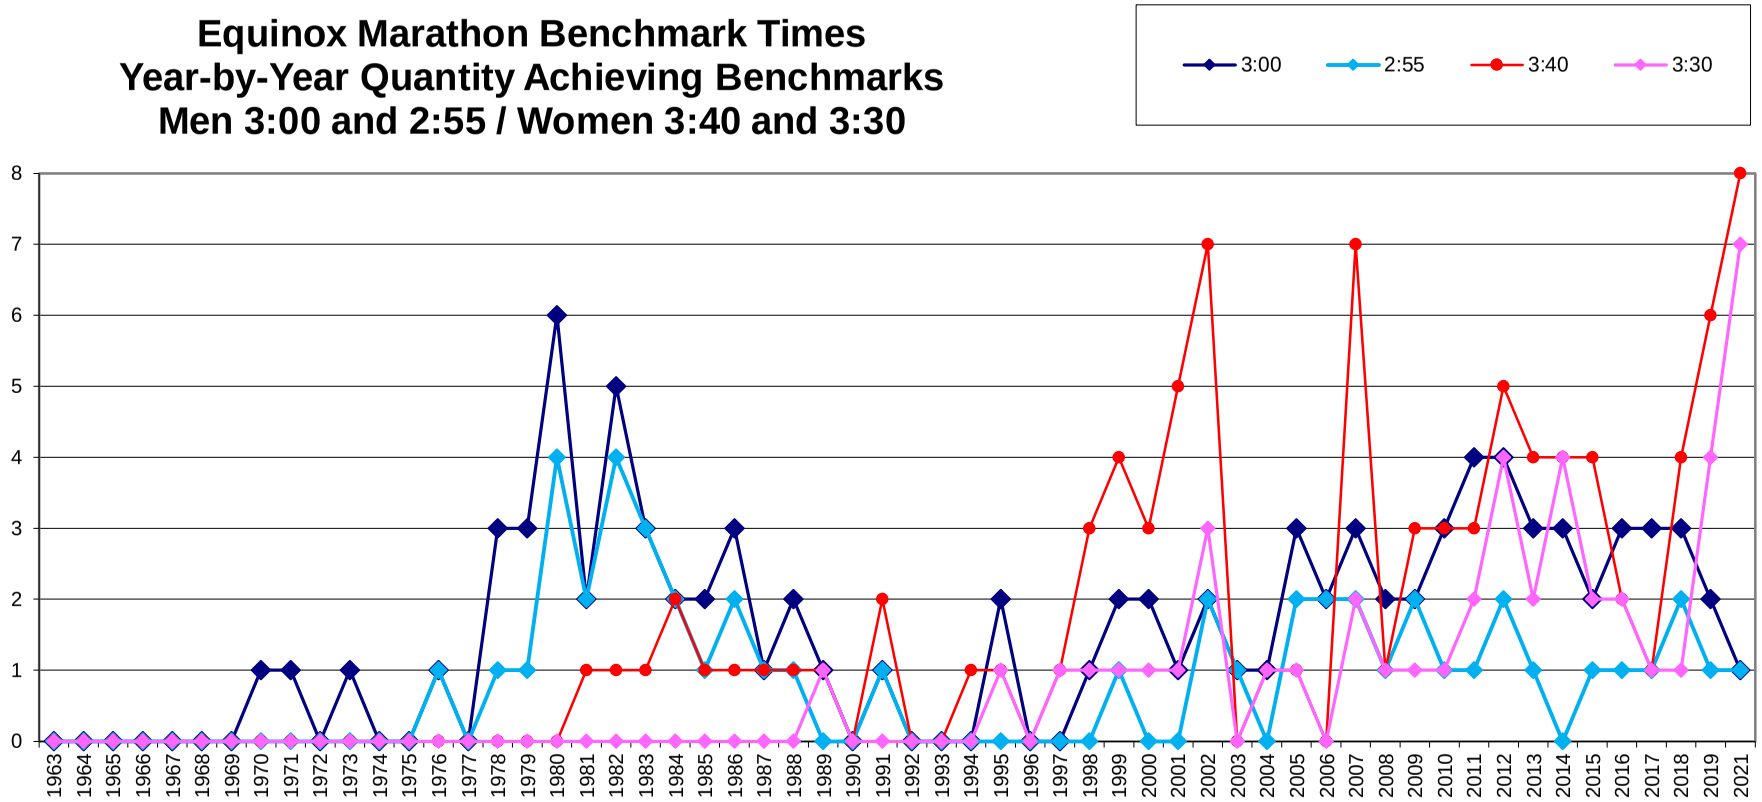
Another rough equivalent is 2:55 for men (49 such performances) and 3:30 for women (46 performances). As we look at times faster than 2:55 and 3:30, there are no natural equivalences.

One interesting note: in 1980 Pat Kling was the 5th woman to break 4:00:00 (after Mel Langdon, Carol Coe, Mara Rabinowitz and Helen Desinger). However, Pat was the first woman to break 3:45:00 and 3:40:00 (3:37:59 in 1981). In 1982, Pat missed, by 53 seconds, becoming the first woman to break 3:35:00. The very next year, 1983, Nancy Felix became the first woman to break 3:35:00 and nearly broke 3:30:00 (3:30:34). In 1989, Felix did become the first woman to break 3:30:00 with a 3:25:19. Tina Devine was the first to break 3:25:00 with a 3:21:21 in 1998. Susan Faulkner and Jane LeBlond became the only two sub-3:20:00 runners with their stirring duel in 2002, Faulkner winning the race in 3:18:16 to LeBlond's 3:19:59. The progression from sub-4:00 to sub 3:20 transpired over 21 races.

Beginning in 2014, Christy Marvin made breaking 3:15 look more and more likely, missing only by 7 seconds in 2018. Despite sub-3:20's becoming more common, 18 races and 19 years would pass between the first sub-3:20 and the first sub-3:15. This year, the first four women all broke 3:15, with the champion, Anna Dalton, breaking 3:10, a truly remarkable performance. 2021 will be a difficult year to beat for fast women's times.

Noteworthy Breakthroughs for Women

1974	Mel Langdon breaks 4:00	1981	Pat Kling breaks 3:45 and 3:40
1983	Nancy Felix breaks 3:35	1989	Nancy Felix breaks 3:30
1998	Tina Devine breaks 3:25	2002	Susan Faulkner breaks 3:20
2021	Anna Dalton breaks 3:15 ***AND*** 3:10		



My purpose in generating this graph was to try to see if there is a female time equivalent to the men's "benchmark" time of 3:00:00, or if there are any other benchmarks that are similar between men and women in terms of the number of runners who have surpassed the benchmark. This is a moving target because more and more women are surpassing what used to be rarely-beaten benchmarks. Currently, the best equivalents are 3:00 for men and 3:40 for women, and 2:55 for men and 3:30 for women. Those numbers are shown in the graph above.

Until the mid-1980's, the women's benchmark equivalent to 3:00 for men was 4:00:00. However, while the difficulty men experienced in breaking 3:00:00 has not changed much, more and more women have broken 4:00:00, and 3:45, and 3:40, etc. In 1986, three hours had been broken 33 times, and four hours had been broken 32 times by women. In 2000 and 2001, the number of times men had broken three and women had broken 3:45:00 was about equivalent (45 men v. 43 women in 2000; 46 v. 47 in 2001). Through 2021, there have been 136 women's sub-3:45s and 93 men's sub-3:00's.

Through 2021, the 3:00 barrier has been broken 93 times by men, and the 3:40 standard has been broken 94 times by women. There have been 49 men's performances under 2:55, and 46 women's times under 3:30. Things are pretty equal, for now, at those break points However, as you can see by the graph, there have been far more women's benchmark performances in recent years than is the case with men.

If the 2021 race is a preview of things to come in the women's field, the benchmark times will need to be recalcllated as more and more women run very fast times, and the "equivaliencies" are sure to change as well.

Section 5 – Field Strength

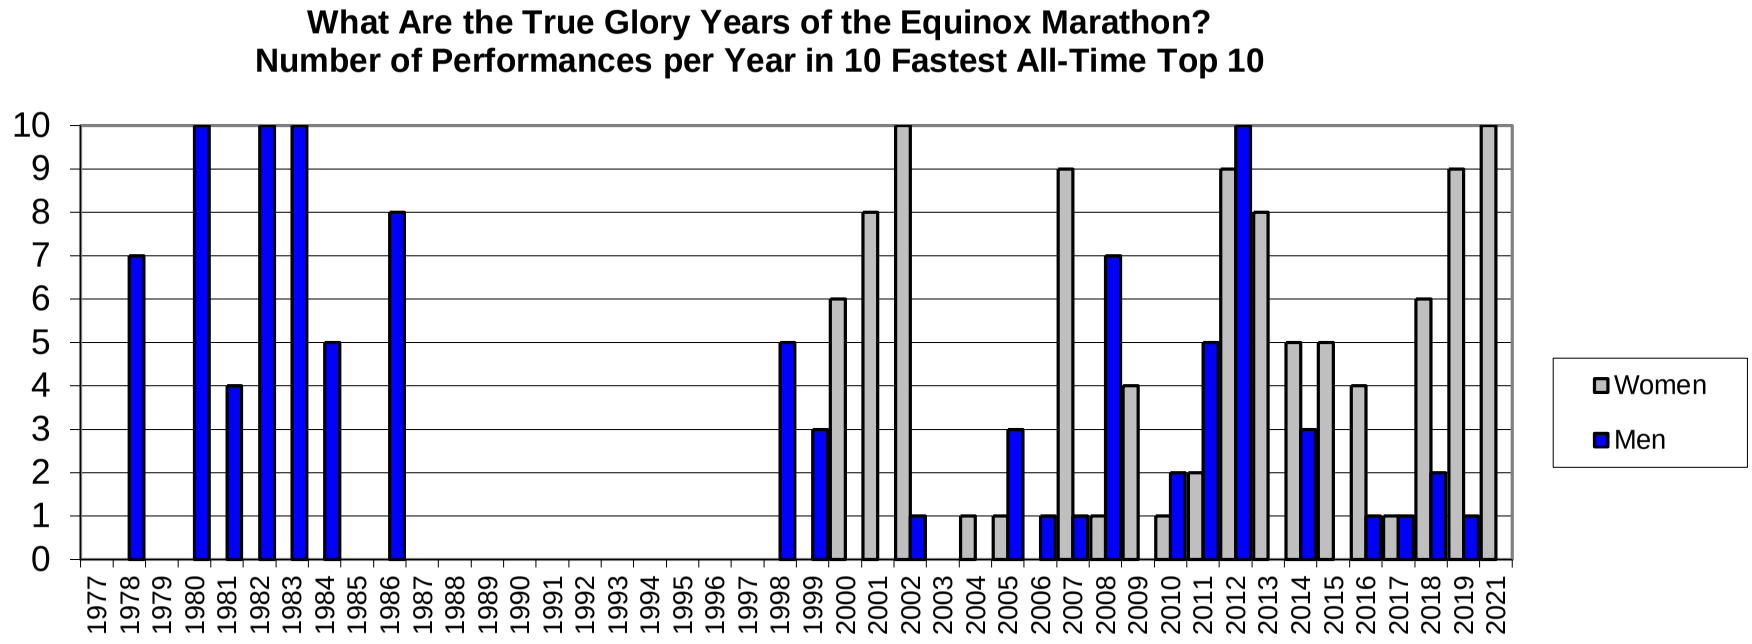
3. Strength of Top 10 Finishers - Graph



The graph above shows how many of the times for the first 10 finishers in a given year are still among the 10 fastest times for one of the top 10 places. The entire men's top 10 are on this list from 1980, 1982, 1983 and 2012; for women, the whole top 10 have made this list two times: 2002 and 2021, and nine of the top 10 in 2007, 2012 and 2019. That is a sign of not just a fast race, but a deep field. All the women in the top 10 in the 2021 race not only made the list, but each of them holds the fastest time for their finish place.

As you can see, the "glory years" for the men were from 1978 through 1986. In that 9 year period, runners recorded 54% of the 10 fastest times for the top 10 places. Included in that period was the "snow year" of 1985 when times were slow. Some hot performances in 1998 and 1999 gave hope that another "glory years" era was on the way on the men's side, but other than the 2008-2012 period where 24 top-10 times were recorded, a second "glory years" era has not occured. The first three finishers in the 2005 race (Kramer, Saari, Brinegar) all posted times among the all-time top 10 for their finish positions. The 2008 race was the first time in 22 years that eight or more men recorded all-time top 10 times, only 7 of which remain among the "top 10-top 10". The 2012 race was the the first race in 29 years with all of the first 10 finishers earning positions on the list. The 2018 race saw only two men move into the all-time top 10 for their position, but that was actually quite a strong year, as all of the first 10 finishers were among the top 17 for their respective finish places.

The 1998 and 1999 races were very strong for the women, but all of those times have since been bumped from the list. The three-year period of 2000-2001-2002 was second only to the past three races (2018, 2019, 2021). In the 00-01-02 period 24 of the times (out of a possible 30) are on the list; 25 times from 18-19-21 are on the list. Frpm 2000 through 2007 a series of strong fields produced 35 times on this list. After a lull from 2008-2011, things really picked up begining with the 2012 race. Almost half of the times on the list (47 of 100) have come in the 2012-2021 period.

Stan Justice has 6 times on this list, Matias Saari, Cody Priest and Everett Rubel four each, and Dave Bloom, Kevin Brinegar, Mike Kramer and Bob Murphy 3 each. Among women, record-holder Christy Marvin and Davya Flaharty both have 5 times on the list, Erika Burr, Tina Devine and Laura McDonough have 4 times each, and six runners, Susan Faulkner, Katie Krehlik, Kinsey Laine, Melissa Lewis, Kristen Rozell, and Christi Schmitz, have 3 times each on this list. Between the men and the women 19 times from 2012 are on this list, the highest number for any single year.

4. The Best Never to Have Won

Equinox Marathon - Close But No Cigar
The Best Runners Never to Win the Equinox Marathon

There are a number of outstanding runners who have run fast times and had high finishes, but who have never made it to the top step of the Equinox Marathon awards podium. Below are listed the Equinox Marathon histories of what I believe to be the best runners who have never won.

To winnow things down a little, I applied these standards: Women: must have finished in the top four at least twice, and/or must have run sub-3:50:00 at least three times or run sub-3:30:00 at least twice; Men: must have finished in the top four at least twice, and must have run under 3:05:00 at least twice.

These standards eliminated female runners Linda Huyck (3:28:17 in 2002), Kat Betters (3:30:34 in 2001), three-time runner up Barb Page (1969-70-71) and Mary Ellen Laberge (2nd, 2x3rd and 5th between 1988 and 1995). Among men, Audun Endestad (2:52:47 in 1983) and Guy Thibodeau (2:53:05 in 1982), not to mention two-time runner-up Donn Wells (1976-77) and Forrest May (4th-3rd-2nd in 1972-73-74) were eliminated.

Take a look at the records, and you can debate who are the best of the best never to have won.
